

# Information Collection Enterprises LLC

INTEGRITY, CONFIDENTIALITY, EXCELLENCE

## Services Provided

Information Collection Enterprises LLC (ICE) assists organizations in managing health care data requirements by providing:

- Clinical Data Abstraction
- Redaction Services
- PQRI Support
- Coding and Coding Validation
- Clinical Module (Tool) Development
- Custom Staff Training
- Medical Record Acquisition

## Why ICE?

ICE offers our customers access to skilled managers with unique experience in managing data collection efforts at a national level and access to a broad talent pool of health care data abstraction professionals, all at very competitive prices.

ICE will assist customers with designing and implementing the right abstraction tool for the data collection requirement, identifying the right health care professional for the task, training and managing the workforce, and delivering the product in a secure and confidential manner, ensuring Protected Health Information (PHI) security.

...Does your organization collect patient data?

...Does your organization perform Quality Data Monitoring?

...Is your organization involved in Public Reporting initiatives?

**If so, contact us today!**

## Mission Statement

Our mission is to provide cost-effective, high quality health care data management services to support public and private health care data collection efforts, ensuring strict security, privacy and regulatory compliance to protect confidential patient information.

## Company Background

Since its establishment in early 2006, ICE has managed clinical data abstraction efforts on a national scale. ICE is a small business whose management team is experienced in supporting U.S. Federal Government and university-based research studies, providing customers with technical, operational and quality assurance expertise while ensuring compliance with Health Insurance Portability and Accountability Act of 1996 (HIPAA) regulations.

ICE was founded by a team of experienced business professionals having combined experience of almost 50 years in directly managing clinical data abstraction efforts. ICE management team members are experienced working with private and public organizations and researchers to define, create, plan, implement and complete large scale health care data projects, always ensuring PHI security compliance.
